# THE NEW MULTILITH® OFFSET MODEL

ONLY THE WORLD'S MOST MODERN

OFFERS ALL THESE PACE SET

## NOW SINGLE LEVER CONTROL OFFERS . . .

- Smooth, Simplified Operation
- Automatic Process Sequence
- Reduced Hand Motions
- Increased Production

From Start to Print in one motion of the hand. One simple hand motion takes you through all the steps in their proper sequence. Operator training is now further simplified.

...SO EASY TO RUN YOU'LL WANT TO RUN IT YOURSELF

### UNPARALLELED VERSATILITY

For black on white or for brilliant colors, produce professional quality copies of every kind and description with the New Multilith Offset Model 1250 featuring single lever control. One or both sides of almost any kind or weight of paper. From easy-to-use direct image, transfer image, or photo sensitive masters, the results of Multilith Offset will please the most critical. One machine, one process, meets every duplicating requirement.

### EXCEPTIONAL QUALITY

Delicate half-tones sparkle. Bold solids are strong and uniform. Fine lines are crisp and clean, when a Multilith Offset Model 1250 is used. This is not coincidence. Each sheet is carefully controlled to insure accurate register. Like expensive commercial equipment. You get professional-looking results on a wide variety of paper finishes . . . from first sheet run to last copy reproduced.

### OUTSTANDING ECONOMY

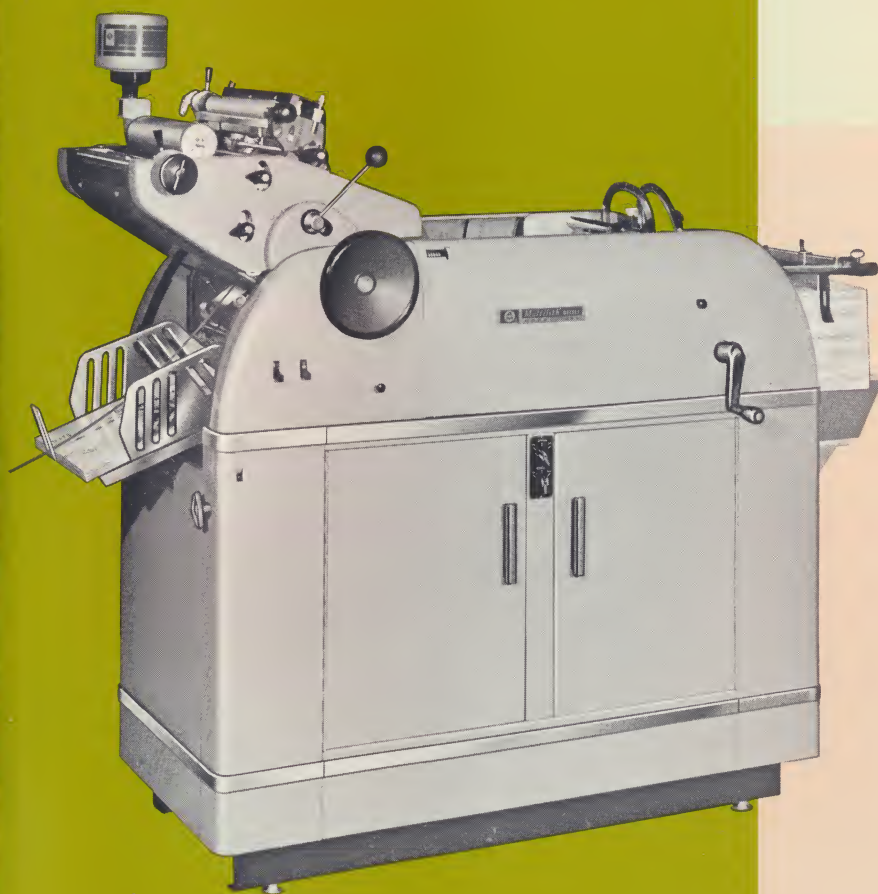

The Multilith Offset Model 1250 is designed and built for high-speed production at the lowest possible cost. Operating controls are conveniently grouped to save time and motion. Machine adjustments are simple and positive for quick, easy changeover with minimum waste. At speeds up to 150 sheets per minute, the Model 1250 turns blank paper into high-quality forms, reports, promotional pieces or whatever is required.

## MODEL 1250 W

Big 11" x 17" capacity opens a new world of cost-cutting opportunities. Engineering drawings, statistical reports, balance sheets, computer data output copies are made quickly and in any quantity required. Folders, reports, house organs, directories and any letter size material is run two-up with half the time and effort.

## ATTACHMENTS to further the versatility of the New Model 1250 Duplicator

- Automatic Blanket Cleaner
- Automatic Master Ejection
- Serial Numbering
- Signature Attachments
- Three Color Process

### Automatic Copy Sorter

Receives and sorts duplicated copies in one continuous high-speed operation. Eliminates manual gathering and speeds distribution of completed sets.

### Chain Delivery and Receding Stacker

Controls, delivers, jogs and stacks up to 5,000 copies without interrupting production. Permits full side-to-side image bleed. Finished copies are stacked directly onto a three-wheeled paper truck for convenient disposition.
